EXPERIENCE

3Beez Technologies, Gilgit — *Web Developer*

Sep-2022 - PRESENT

- Responsible for creating and improving user interface elements and building custom reusable components to enhance user experience on the main company website.
- Implemented solutions that would remove the use of inconsistent sizing, spacing, and typography for frequently used elements. These enhancements improved the overall site design and development speeds for new components and created an easy-to-follow methodology for future components.
- Improved the overall site design and consistency through the creation of a style guide for building components and pages using Javascript.
- Greatly improved overall site performance by refactoring unused JavaScript files and implementing a custom solution for deferring the loading of scripts that were affecting load times. This helped reduce load times by ~5% and increased Google Site Speed scores for desktop and mobile by almost 10 points total.

Sprinted Vision, Gilgit — *Web Developer*

Feb-2023 - PRESENT

- Built new components for two site redesign projects using Javascript, jQuery, and Less with BEM methodologies.
- Quickly onboarded and reduced a large portion of the frontend development backlog that had caused the team to fall significantly behind. My contributions enabled the team to catch up on frontend work within my first two sprints after joining the team.

NAVTTC, GB Pakistan — *Internship Trainee*

Mar-2022 - Sep-2022

- I started learning web development from NAVTC Pakistan which is govt affiliated institute. They also provide the certificate.
- Designed and developed many basic forms and basic websites.

EDUCATION

Karakoram International University, Gilgit

BS in Information Technology

Sep-2019 - Sep-2023

- I will complete my graduate degree from KIU Gilgit. My current CGPA is 3.1/4.
